

## Pregnancy Choices Training

This course, developed for professionals, defines and explains all the options available to women experiencing an unplanned pregnancy. It is open to nurses, doctors, counsellors, community health workers, school counsellors, youth workers, indigenous health workers, and any professional who encounters clients with unplanned pregnancy.

This two and a half day course includes:

- Global, national and local overview
- Exploration of pregnancy options
- Social and political context of unplanned pregnancy
- Genetic issues in pregnancy
- Cultural considerations and migrant health perspective
- Counselling responses to unplanned pregnancy
- Application to practice
