Older Australians, their families and carers are invited to participate in a conversation on ageing with Federal Minister for Mental Health & Ageing Mark Butler on 27 September 2011 in Adelaide.

On 8 August 2011, the Federal Government released the final report from the Productivity Commission's inquiry into aged care "Caring for Older Australians". The report canvasses issues about current aged care services and proposed new ways of providing support to older people in our community.

### **Your RSVP is essential.**

The final report and further information about the Productivity Commission inquiry may be found at [www.pc.gov.au](http://www.pc.gov.au)
