

# APPS FOR AUTISM AND LEARNING

## Making an informed choice

Discover how the most popular forms of technology, the **iPad & iPod Touch**, can make a difference in helping a child with autism to learn. Discuss how to apply **current research** in autism to this new technology.

**Evaluate apps for their quality, flexibility, motivation and suitability to teach:**

Social and Emotional	Behaviour and Sensory	Language and Literacy
Video Modeling Social Stories Comic Strip Conversations Joint Attention Self-Monitoring Scripting Story Boards Emotional Vocabulary Emotional Toolboxes Emotional Regulation Storyboards	Schedules First-Then Preparation and Priming Rewards Rating Scales Timers Choice Making Visual Calendars Activities of Daily Living Discrete Trials Modeling Sensory Regulation Visual Cues	Vocabulary and Sight Words Grammar and Parts of Speech Sentences Conversation Speech Sounds Imitation Semantics Oral and Reading Comprehension Answering Questions Non Literal Language Story Telling Phonological Awareness Phonics and Spelling

Selection of apps for use in AAC requires an individual assessment by a Speech Pathologist and is beyond the scope of this seminar.

### Who should attend?

- ✓ Families, teachers and professionals supporting children in early childhood or primary years.
- ✓ You do not need to own an iPad or iPod Touch or have experience with technology to attend.
- ✓ Anyone who wishes to learn more about this strength based visual approach.

### About Bronwyn Sutton

- ✓ Over 20 years experience in Speech Pathology
- ✓ Autism Consultant to schools and early education programs
- ✓ Specialises in supporting children on the Autism spectrum
- ✓ Lecturer in Autism and Social Skills
